

Floreo

CATALOGUE

for natural and organic honey and for honey products

Why Floreo?

Floreo is a high quality organic honey that originates from the region of Mariovo - one of the ecologically cleanest natural areas of Macedonia.

But Floreo is more than just honey. Floreo is a healthy lifestyle. Floreo is a message that we live healthy, and that we take care of our organism and body.

Floreo is a lifestyle and is an emanation of the new modern lifestyle and the belief that a combination of dynamic life and a quality healthy diet, is possible.

About Us

Raising bee colonies has been our family tradition for more than half a century. This love for bees and beekeeping was started by our grandfather as an independent beekeeper. Today we continue the tradition with undiminished love and enthusiasm. Bee families are located in one of the cleanest ecological environments in Macedonia - the village of Veprcani in the Mariovo region.

In 2006 we started to raise our bee families according to the standards for **Organic Production** and soon we got a certificate, which makes us the first company in Macedonia to produce **Organic Honey** and Bee Products. At the same time, we focused ourselves on investing and building a modern facility for production and packaging of our products.

In 2015, the Floreo brand was created, which became synonym with high quality and organic Macedonian honey.

In 2020, we have opened the first online honey store in Macedonia www.floreo.mk with a completely new rebranding of our products.

Today, as a result of many years of investment, we can say that we are the largest producers of **Organic honey** and bee products in our country with the cultivation of over 1150 certified bee families.
